Ultra small rotor

Ultra small rotor stimulates the spot gently, but 6V is overwhelming power!

Curl code

The compact curl cord extends to about 100cm! Hard to get tangled and hard to break!

Wire break prevention processing

Silicon caps on both ends of the cord to prevent bending and breaking for last long.

LED light

Accurately irradiate with pinpoint when gripping or dialing. The pink light guide lens is used to beautifully project the target.

Easy battery box

Just throw the batteries into the body! Easy battery insertion design without using a cartridge.

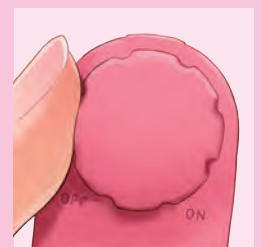

4 batteries (6V)

Powerful vibration with 4 AAA batteries (6V). You can use it immediately after buying it.

Luxury mat processing

The rotor and controller are coated with high-grade silicone. The V mark enhances grip.

Stepless power adjustment

Dial type can be operated easily with one hand! You can change the power smoothly.
